What this scenario establishes

An annual model is included in this calculation. Its tax basis and assumptions must be reviewed before use.

An illustrative rent is neither a market offer nor permission to remove PV, split a parcel or grant access.

Illustrative inputs

- Synthetic 4 MWp plant: 16,000 modules × 250 Wp.
- 4,400 MWh/year generation and 8 ha site area are illustrative inputs.
- No grid import agreement, customer contract or surveyed layout is supplied.

Evidence needed next

- Verify parcel rights, lender restrictions and access.
- Record a dated local valuation or counterparty offer.
- Account for displaced PV and any reinstatement obligations.

SCREENING EVIDENCE PACKAGE · NO SLD

An electrical SLD would not describe this route. PV8 hands over its decision basis and evidence requests; the customer keeps the JSON snapshot and can carry verified site data into its normal land, planning or grid workflow.

- Parcel and rights evidence schedule
- Lease assumptions and lost-generation basis
- Calculation snapshot JSON and checksum

Calculation basis

This report is generated from a frozen synthetic PV8 calculation. No customer information or live provider response is included.
